

MODULE : Simple CSV Export

VERSION : 1.1

AUTHOR : QUADRA INFORMATIQUE

CONTACT : ecommerce@quadra-informatique.fr

This module is used to generate a csv file containing all information for orders for a given interval of dates, or information on a specific order.

Only orders with an 'payment accepted' status are taken into consideration .

After installing the module, the latter will be automatically attached to the "Orders" tab in your back office

There are two ways to use this module :

1) In the "Orders" tab, choose "Export orders" a configuration page appears. This page is composed of :

1. Two date fields to select the start date and end date of your interval.
2. Two radio buttons to choose whether you want to download the CSV file directly, or receive it by mail.
3. A required email field if you check the radio button "yes" or else it will not be included in the treatment.

Error :

- The start date interval should always be less than the end date.
- If you check the radio button «yes», the email field is required.
- Wrong email configuration.

2) In the «Orders» page, choose any order, a button "Export this order by email" is added to the details page of the order selected, click on this button to export order details CSV file by email.

Note: in case of export order details for a specific order, the CSV file will be sent to the email address of the admin logged.

This module is compatible with Prestashop 1.5.x.
