INSTALLATION

1.Go to the menu *Modules* → *Modules of your PrestaShop*

2.Click on *Add a new module* (on the top right corner)

3.Click on *Choose a file*

4.Select the *lgfreeshippingzones.zip* file

5.Click on *Upload this module*

6.Find the *Free Shipping / Delivery by Zone, Carrier, Price and Weight* module

7.Click on *Install*

Shipping and Logistics

Free Shipping / Delivery by Zone, Carrier, Price and Weight v1.2.0 -

by Línea Gráfica

Set free shipping for different geographical zones and carriers based on minimum order price and weight.

Install

8.Click on *Configure*

Shipping and Logistics

Free Shipping / Delivery by Zone, Carrier, Price and Weight v1.2.0 -

by Línea Gráfica

Set free shipping for different geographical zones and carriers based on minimum order price and weight.

Configure

If you get an error during the installation, please read the section 1 of our FAQ.

MODULE CONFIGURATION

1.Choose the zone and carrier that the module must use to calculate free shipping when users are not logged in

WHEN USERS ARE NOT LOGGED IN:

- 📍 Default zone: Europe ([modify](#))
- 🚚 Default carrier: DHL ([modify](#))

2.Calculate free shipping based on the total cart price with TAX included or not

PRICE WITH TAX INCLUDED:

☒ YES ☐ NO

3.Display/hide information messages in the shopping cart

DISPLAY MESSAGE IN CART:

☒ YES ☐ NO

Spend 18,83 € more to get free shipping [↻ Recalculate](#)

Get 1.5 kg more to get free shipping [↻ Recalculate](#)

✓ Your purchase qualifies for free shipping [↻ Recalculate](#)

You have an extra 43,50 € to qualify for free shipping [↻ Recalculate](#)

You have an extra 0.5 kg to qualify for free shipping [↻ Recalculate](#)

TO READ IF YOU USE PRESTASHOP 1.5

To display these messages in the cart, please connect to your FTP, edit the file /themes/votre_theme/shopping-cart.tpl, find the line "table id="cart_summary"" and add this just before it: {hook h="displayBeforeShoppingCartBlock"}

4. Display/hide the debug mode in the shopping cart if free shipping is not applied

DISPLAY DEBUG IN CART:

YES

NO

DEBUG FREE SHIPPING

Carrier ID: 42
Carrier ref: 1
Carrier name: DHL
Zone ID: 1
Zone name: Europe
Shop ID: 1

Total cart price : 81,17 €
TAX included
Minimum price: 100,00 €
Maximum price: 0,00 €

Total cart weight: 0.5 kg
Minimum weight: 2.000 kg
Maximum weight: 0.000 kg

SHIPPING NOT FREE:

Minimum price not reached: 81,17 € < 100,00 €
Minimum weight not reached: 0.5 kg < 2.000 kg

TO READ IF YOU USE PRESTASHOP 1.5

To display the debug in the cart, please connect to your FTP, edit the file /themes/votre_theme/shopping-cart.tpl, find the line "table id="cart_summary"" and add this just before it: {hook h="displayBeforeShoppingCartBlock"}

5. Fill out the columns *Minimum price*, *Minimum weight*, *Maximum price*, *Maximum weight* for the zones and carriers you want

ZONE	CARRIER	MINIMUM PRICE	MAXIMUM PRICE	MINIMUM WEIGHT	MAXIMUM WEIGHT
Asia	DHL	0.00	0.00	0.000	0.000
Asia	Colissimo	0.00	0.00	0.000	0.000
Europe	DHL	100.00	0.00	2.000	0.000
Europe	Colissimo	0.00	0.00	0.000	0.000
Europe (non-EU)	DHL	0.00	0.00	0.000	0.000
Europe (non-EU)	Colissimo	0.00	0.00	0.000	0.000

Free shipping is disabled for the zones and carriers that have 0 set for the 4 values (0.00 | 0.00 | 0.000 | 0.000)

To set free shipping, you need to configure at least one value for the zone and carrier (not necessary to configure the 4 values)

Example for a null price/weight

- If you configure "Minimum price : 0.00" and "Maximum price : 100.00", shipping will be free from 0€ to 100€
- If you configure "Minimum weight : 0.000" and "Maximum weight : 15.000", shipping will be free from 0kg to 15kg

Example up to an infinite price/weight

- If you configure "Minimum price : 100.00" and "Maximum price : 0.00", shipping will be free from 100€ to the infinity
- If you configure "Minimum weight : 15.000" and "Maximum weight : 0.000", shipping will be free from 15kg to the infinity

Example mix price/weight

- If you configure "Minimum price : 100.00" and "Maximum weight : 15.00", shipping will be free from 100€ to 15kg
- If you configure "Minimum weight : 1.500" and "Maximum price : 1000.000", shipping will be free from 1.5kg to 1000€

Example with several minimum/maximum

- If you configure "Minimum price : 100.00" and "Minimum weight : 1.500", shipping will be free as soon as the shopping cart reaches 100€ or 1.5kg (as soon as one of this condition is reached)
- If you configure "Maximum price : 1000.00" and "Maximum weight : 15.000", shipping will no longer be free as soon as the shopping cart reaches 1000€ or 15kg (as soon as one of this condition is reached)

6.Don't forget to save the configuration

FAQ – COMMON ERRORS

All the common errors about this module have been reported below and we explain to you in details how to solve them.

Please read the section that corresponds to your problem **BEFORE** getting in touch with us, you will probably find the answer to your problem in it.

<u>I) I don't manage to install the module.....</u>	<u>8</u>
<u>1.1 File too large.....</u>	<u>8</u>
<u>1.2 Directory not writable.....</u>	<u>8</u>
<u>1.3 Method already overridden.....</u>	<u>8</u>
<u>II) Shipping is not free is my cart.....</u>	<u>10</u>
<u>III) Impossible to save the configuration (empty fields).....</u>	<u>11</u>

If the problem you are having is not listed, then please get in touch with us.

I) I don't manage to install the module

1.1 File too large

When installing the module, you may encounter this error message:

*File too large (limit of ***** bytes)*

Reason of the error: The problem comes from the value of your 'upload_max_filesize' variable that is not large enough compared to the module size.

To solve the problem, you can either :

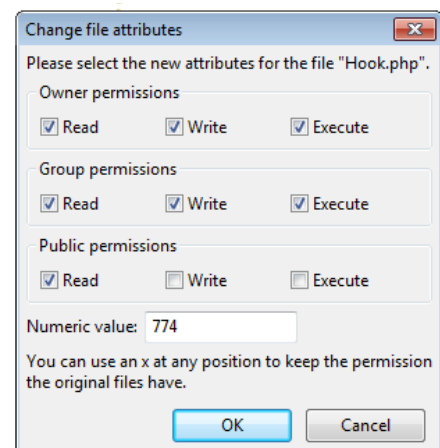

- Go to your FTP and increase the value of your 'upload_max_filesize' variable in the file "/config/ config.inc.php" or in the file "php.ini"
ini_set('upload_max_filesize', '100M');
- Or install the module directly from your FTP, you just need to unzip the module zip file and copy/paste the folder "lgfreeshippingzones" inside the folder "modules" of your FTP (the module will appear in your back-office as soon as the module folder is added into the "modules" folder).

1.2 Directory not writable

When installing the module, you may encounter this error message:

lgfreeshippingzones: Unable to install override: Directory not writable

Reason of the error: The module needs to install a file on your shop (required to make sure the module work) but the current configuration of your server prevents the module from installing this file.

To solve the problem: Change the permissions of your FTP and add writing permission to the « override » folder and the files inside.

1.3 Method getPackageShippingCost already overridden

When installing the module, you may encounter this error message:

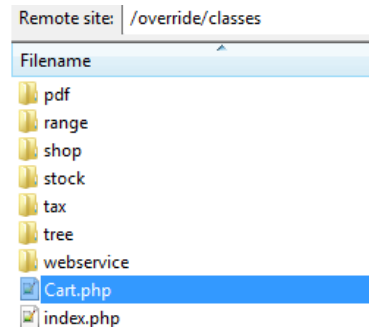

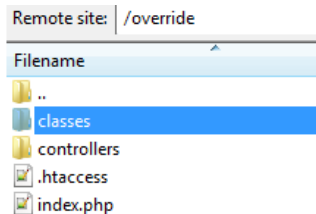

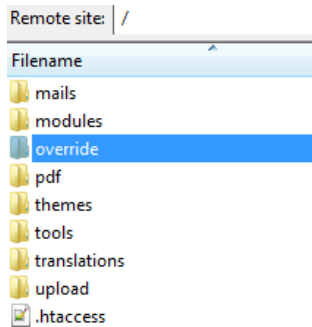

lgfreeshippingzones: Unable to install override: The method getPackageShippingCost in the class Cart is already overridden

Reason of the error: On PrestaShop 1.5 and 1.6, the module automatically creates an override (required to make sure the module work) inside the folder override/classes/Cart.php. The problem is that you already have an override with

the same name (created by another module), which prevents our module from installing.

To solve the problem, you have to:

- a) Connect to your FTP
- b) Go to the folder *Override* → *Classes* and find the file *Cart.php*

- c) Rename the file *Cart.php* to *Cart2.php*
- d) Go to your backoffice and install the free shipping module

Shipping and Logistics
Free Shipping / Delivery by Zone, Carrier, Price and Weight v1.2.0 -
 by Línea Gráfica
 Set free shipping for different geographical zones and carriers based on minimum order price and weight.

- e) The module will be installed and a new file *Cart.php* will be created on your FTP
- f) Combine both overrides manually : open the old override *Cart2.php*, copy its content and paste it into the new override *Cart.php*

Warning :

To do it correctly, it's important to respect the file structure

```
class Hook extends HookCore
{
    function A
    {
        [...]
    }
    function B
    {
        [...]
    }
    [...]
}
```

If you also have the same functions in the old override, don't duplicate the functions but combine them

II) Shipping is not free in my cart

2.1. FTP verifications

- Make sure that the file /override/classes/Cart.php exists
- Make sure that this file contains the word “lgfreeshippingzones”
- Go to the folder Cache and delete the file class_index.php if there is one

2.2. Back-office verifications

- Make sure that the non PrestaShop modules and the overrides are not disabled (**PS 1.6 only**). You should have the same configuration as this (menu *Advanced parameters* → *Performance*) :

- Make sure that your handling charges are at 0 (menu *Shipping* → *Preferences* (PS 1.6) or menu *Shipping* → *Shipping* (PS 1.5))

2.3. Enable the Debug module in the module

```

DEBUG FREE SHIPPING
---
Carrier ID: 42
Carrier ref: 1
Carrier name: DHL
Zone ID: 1
Zone name: Europe
Shop ID: 1
---
Total cart price : 81,17 €
TAX included
Minimum price: 100,00 €
Maximum price: 0,00 €
---
Total cart weight: 0.5 kg
Minimum weight: 2.000 kg
Maximum weight: 0.000 kg
---
SHIPPING NOT FREE:
Minimum price not reached: 81,17 € < 100,00 €
Minimum weight not reached: 0.5 kg < 2.000 kg
    
```

- Make sure that free shipping is set for the current zone, carrier and shop
- Make sure that the price or weight set is reached and not exceeded
- If the carrier or the zone is “Undefined”, go back to the module and click on “Modify” (don’t chose “Best price” or “Best grade” for the carrier)

WHEN USERS ARE NOT LOGGED IN:

- 📍 Default zone: Europe ([modify](#))
- 🚚 Default carrier: DHL ([modify](#))

III) Impossible to save the configuration (empty fields)

📍 ZONE	🚚 CARRIER	➤ MINIMUM PRICE	➤ MAXIMUM PRICE	➤ MINIMUM WEIGHT	➤ MAXIMUN WEIGHT
Asia	DHL	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
Asia	Colissimo	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
Europe	DHL	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
Europe	Colissimo	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
Europe (non-EU)	DHL	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
Europe (non-EU)	Colissimo	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>

To solve the problem: You just need to reset (or uninstall + install) the module.
