PRESENTATION

This module for Prestashop manages several prices display in the product page in front-office:

Prices per quantity for simple products

Combination prices

Prices per quantity combinations

INSTALLATION

MODULE INSTALLATION

The module respects the nominal Prestashop module installation mechanism. Copy the 'oleaxxx' directory of the delivery into the 'modules' directory of you Prestashop installation or upload it through the 'module' tab in Back-Office.

Module is then visible in the 'Modules' Back-Office pane. Install it with its 'Install' button.

BACK-OFFICE MANAGEMENT

FO Quantity Prices Module V1.7

The configuration pane of the module manages the way to display the prices in the Front-Office product page.

GENERAL SETTINGS

General settings

Nominal discount display/specific hook [Click to view](#)

If you want to suppress the nominal discounts block display on the product page:

- Open the file product.tpl in your theme
- Search the line (around line number 450):

```
{if (isset($quantity_discounts) && count($quantity_discounts) > 0)}
```
- Replace it by :

```
{if (0 AND isset($quantity_discounts) && count($quantity_discounts) > 0)}
```
- Just before this line, you can add the following hook call :

```
{hook h='oleaqtyTopProduct'}
```

Ajax AddtoCart in list ☒ ☐ ☒ ☐

In products listings in product, propose or not the ajax popup for adding to cart

Display group prices ☐ ☒ ☒ ☐

In all table prices, display or not the price, as stroked, for the group of the customer

Save

Nominal display / Specific hook: this part explains how to remove the native quantity reduction displayed by Prestashop. It also explains how to add a hook in your product.tpl page to place the prices array at the exact place you want in the product page. In particular, in the 1.6 theme, use this hook in place of the native display, as there is no native hook near the native discount display.

Ajax AddToCart in list: through this parameter, when the customer click an AddToCart button of a page listing products (like Categories, suppliers, search result...), a popup is displayed, containing the prices and combinations table. The customer can then add the combination and the quantity he wants form this popup. This avoids going into the product page.

Display group page: in case the customer has his own specific prices, this parameter allows to display the prices of his customer group.

FO Quantity Prices Module V1.7

PRODUCTS SETTINGS

These parameters concern the page of simple product, i.e. products without combinations.
